Hello,

I have heard of the new plan to allow political correspondence to evade my spam box. I am vehemently opposed to this plan. I would NOT like political correspondence from either party to be allowed into my inbox.

Thank you,

R. Barrett

I am writing to strongly object to the proposal to allow politispam to pass through into my inbox unfiltered. I am perfectly capable of adding a desired sender to my safe senders list, if I so desire. I have already had to abandon several email addresses as they simply became overwhelmed with spam, a good portion of it political.

Subject: Google's pilot program to allow political emails into Inboxes --how can I comment?
Date: Wednesday, July 27, 2022 2:26:41 PM

Just spent 30 minutes trying to comment on a Google proposal to allow political emails into Inboxes.

I can't believe how difficult you folks make it! I can't find any link to submit my comment.

My opinion In brief:

DO NOT allow Google to make it easier for Political emails to bypass our filters or permanent deletions. Google might consider adding a "Political" inbox that we could access or ignore at our discretion.

thank you

p.s. I would still like to know how to submit a comment properly. The FEC website's verbiage is overwhelming and confusing; I could not find a direct link.
